## **Consumer Price Index in Urban Areas in Iran**

Shahrivar 1387

(1383=100)

The Consumer Price Index (**CPI**) went up 3.9 percent in Shahrivar 1387. Showing the index point of 185.7, the **CPI** was 29.4 percent higher than the similar month in 1386.

During the first six months of the current Iranian year, the Consumer Price Index rose 26.5 percent, compared to the similar period in 1386.

The inflation rate increased 23.3 percent during twelve months ending Shahrivar 1387.

During Shahrivar 1387, the food and beverages group index increased 6.0 percent, mainly due to the increase of the price for “poultry” by 13.1 percent. This advance was additionally caused by the rise of other indices such as “orange” 36.1 percent, “leafy green vegetables” 15.9 percent, “eggs” 16.5 percent, “livestock meat” 2.7 percent, “cucumber” 16.0 percent, “peach” 34.7 percent, “banana” 21.3 percent, “bread” 3.3 percent, “apple” 2.9 percent, “fish” 4.3 percent, “pear” 17.8 percent, “pasteurized cheese” 3.2 percent, “tomato paste” 2.4 percent and “grapes” 3.2 percent. In this group, the indices of “rice”, “potato”, “tomato” and “sugar and sugar lump” decreased 1.9 percent, 3.1 percent, 2.2 percent and 0.3 percent, respectively.

During Shahrivar 1387, the tobacco group index remained unchanged.

The clothing and footwear group index rose 1.2 percent, largely as a result of the increase in the “ready to wear clothing” index by 1.1 percent. In this group, the index of “footwear” went up 1.2 percent.

The housing, water, electricity, gas and other fuels group index rose 4.8 percent, mainly due to the increase of the indices for the “rental equivalence of owner occupied houses” and the “rent of residential houses” each by 5.4 percent. In this month the index of “maintenance and repair services” went up 1.6 percent.

The furnishings, household equipment and routine household maintenance group index rose 2.3 percent. This advance was mainly due to the rise of the “goods and services for routine household maintenance” group index by 10.2 percent, which was largely caused by the sharp increase of the price for “detergent (powder)” by 20.9 percent.

During Shahrivar 1387, the medical care group index went up 2.1 percent, largely as a result of the increase in the indices for “hospital services”, “medical, paramedical and dental services” and “medical products, appliances and equipment” by 3.2 percent, 1.3 percent and 3.2 percent, respectively.

The transportation group index rose 0.9 percent, mainly due to the increase of the index for the “transport services” by 1.8 percent.

In this month the communication group index remained unchanged.

The recreation and culture group index increased 2.7 percent.

The education group index went up 1.4 percent.

The restaurants and hotels group index rose 0.8 percent, principally due to the increase of “food away from home ” index by 0.8 percent.

The miscellaneous goods and services group index went up 1.2 percent.
