

## AGRICULTURE

**B**ased on the data released by the Ministry of Jihad-e-Agriculture, in 1390, major agricultural products including farming, horticultural, livestock, and fishery products were estimated at about 91.6 million tons, showing 3.0 percent decrease compared with the previous year.

Based on preliminary data, the value-added of the agriculture sector decreased by 0.1 percent in 1390 (at constant 1383 prices). This variable had indicated 4.9 percent increase in the previous year. Decrease in precipitation was the main factor behind the fall in the value-added of the agriculture sector in 1390.

**Table 2.1. Agricultural Products (thousand tons)**

			Growth rate (percent)	Share in total (percent)	
	1389▲	1390		1389	1390

According to the Ministry of Energy, in 1389/90 farming year<sup>1</sup>, total precipitation

<sup>1</sup> Second half of 1389 and first half of 1390

amounted to 328.2 billion cubic meters (199.1 millimeters on average by area under cultivation), showing 16.0 percent reduction compared with the previous farming year and 19.0 percent fall compared with the long-term average (42 years). Furthermore, the volume of surface water flows reached 44.2 billion cubic meters, indicating 15.0 percent fall compared with the previous farming year and 51.0 percent reduction compared with the long-term average.

**Figure 2.1. Cumulative precipitation**

### Farming<sup>2</sup> and Horticultural Products

Based on the data released by the Ministry of Jihad-e-Agriculture, in 1390, about 79.9

<sup>2</sup> 1389/90 farming year, beginning as of Mehr 1389 and continuing until Shahrivar 1390, is briefly referred to as 1390 in tables and figures.

## Chapter 2 AGRICULTURE

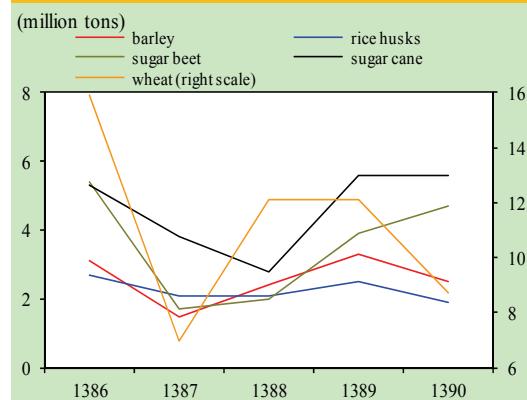

million tons of farming and horticultural products were harvested, showing 3.8 percent decrease compared with the previous year. Of total agricultural products, 65.4 million tons (81.9 percent) were farming products, showing 5.8 percent decrease compared with the year before. On the other hand, horticultural products amounted to 14.5 million tons, indicating 6.0 percent increase.

Grain production (wheat, barley, rice husks, and corn) decreased by 23.3 percent to 15.0 million tons. Among these four products, production of wheat had the highest share of 57.8 percent. Wheat production decreased by 28.5 percent and amounted to 8.7 million tons in 1390. Production of rice husks and barley fell 24.0 and 23.1 percent, respectively, compared with the year before.

In 1390, total production of agro-industrial crops<sup>1</sup> experienced a rise of 9.2 percent and reached 11.1 million tons. Moreover,

production of sugar cane and sugar beet, which had the highest shares of respectively 51.0 and 42.5 percent among agro-industrial crops, amounted to 5.6 and 4.7 million tons, respectively. Production of cotton, as the major input of textile industry, experienced the highest increase by 61.7 percent.

### Livestock and Fishery Products

According to the Ministry of Jihad-e-Agriculture, total livestock products (red meat, milk, poultry, eggs, and honey) amounted to 11.0 million tons in 1390, showing a rise of 2.9 percent compared with the previous year.

**Table 2.4. Livestock Products (thousand tons)**

<b>Total</b>	<b>10,654</b>	<b>10,961</b>	<b>2.9</b>

Source: Ministry of Jihad-e-Agriculture

Fishery products totaled 735 thousand tons, showing 10.8 percent growth compared with the previous year. It is to be noted that 56.0 percent of fishery products were related to the Persian Gulf, about 38.8 percent to the aquaculture centers, and the remaining were produced from the Caspian Sea. The weight and value of fishery exports were 57 thousand tons and \$212 million, up by respectively 27.6 and 32.3 percent compared with the year before.

### Guaranteed Purchase of Agricultural Products

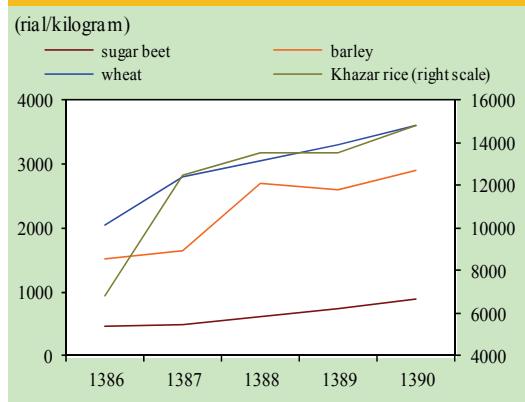

The guaranteed purchase of agricultural products continued in 1390, with the aim of producing basic agricultural products, establishing a balanced production system, and maintaining farmers' income level. In 1389/90 farming year, among 20 farming products, the guaranteed purchase price of 2 products showed decrease while that of other products increased (except for the guaranteed purchase price of onion (autumn planting) which remained unchanged). The highest increase in the guaranteed purchase price of agricultural products was related to "raw cotton" and "sugar beet" by 20.0 percent, to reach Rls. 9,000 and Rls. 900 per kilogram, respectively.

**Table 2.6. Guaranteed Purchase Price of Major Agricultural Products (rial/kilogram)**

### Subsidies

In implementation of Subsidy Reform Plan as of end-Azar 1389, cash subsidies were directly paid to households and different economic sectors by "Organization of Targeted Subsidies". Based on Article 8 of Subsidy Reform Plan, the government is required to spend 30 percent of net receipts from the implementation of this Plan on grants-in-aid, subsidies on loans and facilities extended by banks, or administered funds in implementation of the following:

A. Optimizing energy consumption in productive, services, and residential units,

and encouraging implementation of energy saving plans, and in observance of the consumption pattern as determined by the relevant executive organization;

B. Reforming the technological structure of productive units, aiming at enhancing water and energy efficiency, and developing generation of electricity from renewable energy sources;

C. Compensating the utility companies for part of the losses incurred as a result of implementing this Plan, including water and sewage, electricity, natural gas, and oil products companies, as well as the municipalities and the village councils;

D. Developing and improving public transportation, within the framework of Public Transportation Development and Fuel Consumption Management Law, with maximum disbursement as set by Article 9 of that Law;

E. Supporting the producers in the agriculture and manufacturing sectors;

F. Supporting the production of industrial bread;

G. Promoting non-oil exports;

H. Developing interactive electronic services to eliminate or reduce the unnecessary commuting.

In line with the provisions of the mentioned Article, Organization of Targeted Subsidies paid Rls. 95.2 trillion to productive and services units in 1390. According to the relevant report released by this organization, share of the agriculture sector in total subsidy payment in 1390 was 18.5 percent.

**Table 2.7. Subsidy Payments Based on Article 8 of Subsidy Reform Plan in 1390**  
(billion rials-percent)

	Value	Share in total

### Government Investment

Based on the data released by the Ministry of Economic Affairs and Finance, in 1390, government credits for the acquisition of non-financial-national assets for the development of "agriculture and natural resources" and "water resources" amounted to Rls. 32.3 trillion, up by 47.1 percent compared with the previous year. Therefore, 89.9 percent of total approved credits (Rls. 35.9 trillion) were realized.

Credits for the acquisition of non-financial-national assets projects paid to "agriculture and natural resources" sector increased by 80.2 percent to Rls. 6.8 trillion. "Improvement of agricultural lands" had the lion's share of credits allocated to the "agriculture and natural resources" sector by 39.7 percent.

**Table 2.8. Credits for Acquisition of Non-financial-National Assets for Development of "Agriculture and Natural Resources" and "Water Resources"**  
(billion rials)

	1389	1390	Percentage change	Share (percent)		1390

Agriculture and natural resources	3,766.3	6,785.6	80.2	17.1	21.0	8,431.6	80.5
Water resources	18,198.6	25,524.8	40.3	82.9	79.0	27,514.5	92.8
<b>Total</b>	<b>21,964.9</b>	<b>32,310.3</b>	<b>47.1</b>	<b>100.0</b>	<b>100.0</b>	<b>35,946.1</b>	<b>89.9</b>

Source: Ministry of Economic Affairs and Finance, and Budget Laws for 1389 and 1390

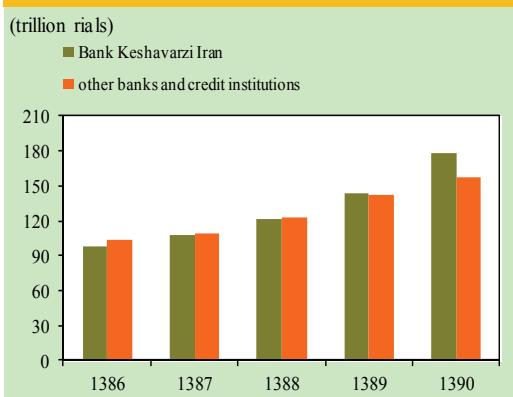

National expenditures for the acquisition of non-financial assets projects for the development of "water resources" amounted to Rls. 25.5 trillion, up by 40.3 percent compared with the year before.

### Banking Facilities

By the end of 1390, outstanding facilities extended by banks and non-bank credit institutions to public and non-public agriculture sectors grew by 17.1 percent to Rls. 338.3 trillion. The share of non-public sector in outstanding facilities was 99.4 percent.

By the end of Esfand 1390, outstanding facilities extended by Bank Keshavarzi Iran (Agriculture Bank of Iran) to non-public agriculture sector increased by 24.4 percent and amounted to Rls. 178.5 trillion.

**Figure 2.4. Outstanding facilities extended by banks to non-public agriculture sector**

## Chapter 2 AGRICULTURE

In this year, share of Bank Keshavarzi Iran in total outstanding facilities extended to public and non-public agriculture sectors increased by 3.1 percentage points to 53.1 percent compared with 1389.

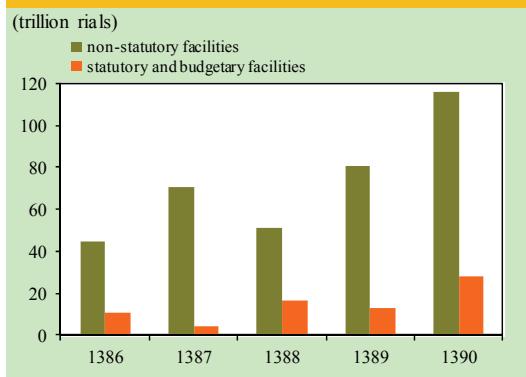

In 1390, Bank Keshavarzi Iran paid Rls. 143.9 trillion to farmers through non-statutory and statutory facilities, administered funds, and contracts, up by 52.7 percent compared with the year before. Of total credits paid by this bank, 80.4 percent (Rls. 116 trillion) were from non-statutory resources, and the remaining credits (19.6 percent) were in the form of statutory facilities, administered funds, and contracts. Share of non-statutory resources in total was lower than the corresponding figure of 1389 (85.9 percent).

Composition of facilities extended by Bank Keshavarzi Iran according to Islamic contracts reveals that partnership contracts had the highest share by 40.0 percent. In this year, a sum of Rls. 58.0 trillion was paid in the form of partnership contracts, indicating a rise of 39.8 percent compared with last year's performance.

Composition of facilities extended by Bank Keshavarzi Iran by use indicates that credits allocated to "agricultural industries

and services", enjoying the highest share in total facilities by 37.0 percent, increased by 131 percent to Rls. 53 trillion. In 1390, facilities paid by Bank Keshavarzi Iran to all activities increased. The highest increase by 131.0 percent was related to "agricultural industries and services", followed by "fishery and aquatic plants and animals" by 72.9 percent. The value of facilities extended by "Bank Keshavarzi Iran" to other sectors (trade services and industries other than agriculture) decreased by 44.9 percent compared with the year before, bringing the share of other sectors in total facilities extended by this bank to 6.0 percent.

### Agricultural Insurance Fund

In 1389/90 farming year, about Rls. 10.2 trillion was paid by Agricultural Insurance Fund as compensation, showing a rise of 76.9 percent compared with the previous farming year.

Due to the fact that this Fund is a loss-making institution, a large proportion of its commitments on compensations is financed through government subsidies. Share of government subsidies in total paid compensation was about 77 percent on average during 1384-1390, while only 23 percent was financed out of farmers' premium payments.

According to the report released by the Agricultural Insurance Fund, in 1389/90 farming year, this Fund insured 6.1 million hectares of lands under cultivation of 60 farming and horticultural products against losses from natural disasters. This shows 32.3 percent increase compared with the previous year. Of total insured lands in 1390, approximately 4.2 million hectares were damaged for which a sum of Rls. 7.2 trillion was paid by the Fund as compensation. The amount of compensation indicated 80.5 percent rise in this year compared with 1389.

**Table 2.11. Performance of Agricultural Insurance Fund**

### Performance of Rural, Women, and Agricultural Cooperatives and Unions

According to the Central Organization for Rural Cooperatives, the number of active rural, women, and agricultural cooperatives came to 5,164 by end-1390. These cooperatives covered 5.6 million rural dwellers. This indicated 2.2 and 0.7 percent decrease in terms of the number and members of cooperatives, respectively.

The number of cooperative unions in small cities increased by 13.7 percent to 447 while the number of member companies decreased by 3.4 percent to 3,926 by end-1390.

**Table 2.13. Rural, Women, and Agricultural Cooperatives and Unions**

<sup>1</sup>Referring to annual performance

In this year, rural cooperatives purchased about 197 thousand tons of various agricultural products at guaranteed prices, down by 87.7 percent compared with the year before. Moreover, they bought 2.3 million tons of agricultural products at agreed prices, indicating 79.8 percent rise compared with 1389.

### Exports of Agricultural Products

Based on the data released by the Ministry of Jihad-e-Agriculture, 3.7 million tons of various agricultural products, worth \$5.5 billion, were exported in 1390, indicating 13.3 percent reduction in terms of weight and 3.8 percent rise in terms of value compared with the previous year. Exports of agricultural products accounted for 5.6 percent of weight and 16.4 percent of value of total exports through Customs. In 1390, "farming and horticultural products" accounted for 70.7 percent of total agricultural exports in terms of weight, and 61.1 percent of total agricultural exports in terms of value.

### Imports of Agricultural Products

Based on the data released by the Ministry of Jihad-e-Agriculture, approximately 13.0 million tons of various agricultural products

valued at \$10.0 billion were imported, indicating 13.3 percent fall in terms of weight and 7.5 percent rise in terms of value. Imports of agricultural products accounted for 16.1 percent of value and 33.7 percent of weight of total imported products. The average value of each ton of imported agricultural products was \$770, up by 24.0 percent compared with the previous year.

Imports of wheat amounted to 282 thousand tons in 1390, representing 67.5 and 53.3 percent reduction in terms of weight and value, respectively. The highest growth in the weight and value of major farming products, by 204.1 and 403.6 percent, respectively, was related to barley.

The trade balance of the agriculture sector ran a deficit of \$4.4 billion in 1390, showing an increase of 12.5 percent compared with the previous year.

**Table 2.16. Trade Balance of Agricultural Products**  
(million dollars)

	1389	1390	Percentage change
