Export Price Index in Iran

Mehr 1395

(1390 = 100)

The Export Price Index (**XPI**) decreased 0.2 percent in Mehr 1395* following a 0.3 percent decline in Shahrivar 1395. The index level of 214.1 was 6.2 percent lower than that in Mehr 1394.

During the first seven months of the current Iranian year, the XPI declined 9.6 percent compared to the similar period in 1394.

The XPI has fallen 13.2 percent over the past twelve months.

In Mehr, the animal products group index went up 0.4 percent.

The 8.8 percent decrease in the vegetable products group index was mainly due to the decline in the prices for pistachio, raisin, saffron and cumin.

The animal or vegetable fats and oils group index turned up 4.1 percent over this month.

The prepared foodstuffs, beverages and tobacco group index fell 1.0 percent, mostly as a result of the decline in the price for tomato paste.

During the mentioned month, the mineral products group index went up 0.2 percent.

The products of the chemical or allied industries group index rose 2.4 percent. The mentioned advance was led by increases in the prices for methanol, ammonia, dodecyl benzene and styrene. Despite those increases, the prices for paraxylene, "detergent powders and liquids" and urea fertilizer reduced in this month.

* The index is computed on the Iranian Rial basis. In this month, the exchange rates of Dollar and Euro increased 0.9 percent and 0.4 percent, respectively.

During Mehr, the group indexes for "plastics and articles thereof, rubber and articles thereof" and "skins and leather and articles thereof" each rose, advancing 0.5 percent and 0.9 percent respectively, while the products of the wood and articles of wood group index fell 3.0 percent.

The textiles and textile articles group index turned up 5.2 percent which was principally due to the increase in the price for hand woven carpet.

The group index for footwear moved up 1.0 percent over this month.

The articles of stone group index went up 1.2 percent which was attributed to the advance in the price for float glass.

The base metals and articles of base metal group index increased 1.5 percent. Higher prices for zinc ingot, lead ingot and cathode copper were the major reasons for this advance. In contrast, the price for aluminium ingot declined.

During the mentioned month, the machinery and mechanical appliances, electrical equipment group index and the vehicles and associated transport equipment group index increased, each by 0.7 percent.
