## **Producer Price Index in Iran**

### **Farvardin 1389**

**(1383 = 100)**

The Producer Price Index (**PPI**) went up 0.9 percent in Farvardin 1389. The index level of 190.7 was 10.4 percent higher than in Farvardin 1388.

The Producer Price Index increased 7.3 percent during the last twelve months leading to Farvardin 1389, compared to the similar preceding period.

In Farvardin, the agriculture, hunting and forestry group index went up 0.4 percent.

The fall in the index for Persian Gulf fish principally caused 8.1 percent decrease in the group index for fishing.

The manufacturing group index rose 0.7 percent.

The 2.4 percent advance in the group index for hotels and restaurants was mostly due to the increase in the index for hotels and inns.

As a result of rising in the index for land transport, the transport, storage and communications group index moved up 1.7 percent.

The education group index was virtually unchanged.

The advance in the indices for hospital activities and medical and dental practice activities largely caused 1.2 percent rise in the health and social work group index.

The other community, social and personal service activities group index went up 4.6 percent, which was mainly attributed to the rise in the index for cultural and sporting activities and cost of funeral and related activities.
