## **Producer Price Index in Iran**

**Esfand 1389**

**(1383 = 100)**

The Producer Price Index (PPI) went up 1.9 percent in Esfand 1389 following a 3.6 percent rise in Bahman 1389. The index level of 253.7 was 34.2 percent higher than in Esfand 1388.

On average, the Producer Price Index in 1389 increased 16.6 percent compared to the previous year.

In Esfand, the agriculture, hunting and forestry group index went up 1.3 percent, which was mainly attributed to the rise in the indices for patch vegetables, poultry and egg. In this group, the price for leaf vegetables moved down.

The advance in the index for Persian Gulf fish principally caused 2.7 percent increase in the group index for fishing.

As a result of rising in the indices for walnut, starches and starch products, manufacture of fabric, exported sulphur, fertilizers and nitrogen compounds (domestic use), plastic in primary forms (domestic use), van rubber tires, truck and bus rubber tires, iron beam, iron profile, aluminum ingot and furniture, the manufacturing group index moved up 2.7 percent. In this group, the prices for soya oilcake, exported paraxylene, iron sheet and wire went down.

The hotels and restaurants and the transport, storage and communications group index increased 1.0 percent and 0.5 percent, respectively.

The education group index went up 0.1 percent.

The 1.2 percent advance in the group index of health and social work was mostly attributed to the increase in the index for dental services.

As a result of rising in the indices for hairdressing and other beauty treatment, the other community, social and personal service activities group index moved up 2.7 percent.
